

Bringing the
Future of
Cardiovascular
Health to Life™

CENTER FOR CLINICAL RESEARCH

The Texas Heart Institute's Center for Clinical Research supports all areas of cardiovascular clinical research, from protocol development to trial facilitation and post-trial assessment and reporting. Our team of experts supports clinical trial management activities for all of the Institute's research departments, in addition to out-sourced clinical trial management activities for private practice and academic clinicians.

The center performs in several different capacities for clinical research trials – sponsor, contracted research organization (CRO), coordinating center, fee-for-service and as a trial site. We provide resources, expertise and best practices to facilitate proficient, compliant and ethical study conduct and management.
